Dear Mr. Weisberg,

I wrote you almost 2 years ago, and now I am at it again. I now work for the Boy Scouts of America in Southeast Arkansas. My job w/ the Scouts allows me to schedule a healthy part of my time for studying + researching the Dallas tragedy.

In my years of study I have held firm the belief that if we could explain Oswald's sudden trip to the movies, and find out why and who concerning the Tippit's murder the rest of the case would fall into place. In other words, I feel like Oswald's movie trip + Tippit's murder are the rosetta stone in the case.

I was shocked to find that the Warren Commission had absolutely no credible evidence concerning Tippit's death. The Warren Commission chose to ~~belief~~ believe confused witnesses and to totally ignore the best evidence Tippit's body. Nowhere in the 26 volumes have I found any mention of the autopsy on

STEWART MAYERS

p. 2

Tippit not to mention the autopsy report. The most important piece of evidence in the entire case was totally ignored! Also, the ballistics evidence was untraceable, and the casing found at the scene didn't match the revolver Oswald carried.

My intentions are to write a major work on the Tippit murder. Do you know where I might obtain copies of primary documents concerning this case? I'm speaking of the autopsy report, police homicide reports, etc.

I have reread your chapters in Whitewash & Whitewash II in preparation for my research - Also - do you know any way to locate Tippit's widow - I know she remarried & was widowed again, and that she lived in Dallas until at least 18 months ago - Anyway, any information you can send me would be appreciated.

Thank you for your help.

Sincerely,

Stewart
